Instructions for Installing the SAFARI Montage® SuperSet XXXI Supplemental Drive

Overview

The SAFARI Montage SuperSet XXXI Supplemental drive you have just received works in conjunction with earlier release SuperSet content drive(s) to provide new content to your SAFARI Montage server.

Contents

- SAFARI Montage SuperSet XXXI Supplemental Content Drive

Prerequisites:

- SAFARI Montage 5.9.28
- Any combination, high or low resolution, of the following previously released SuperSets:
  - SuperSet XX
  - SuperSet XXI
  - SuperSet XXII
  - SuperSet XXIII
  - SuperSet XXIV
  - SuperSet XXV
  - SuperSet XXVI
  - SuperSet XXVII
  - SuperSet XXX
- Available drive bay

Please read these instructions in their entirety before you begin:

- Review any questions with Technical Support in advance. Please note that SAFARI Montage Technical Support is available Monday – Friday from 8 a.m. to 6 p.m. Eastern Time and they may be contacted by telephone at 800-782-7230 or online via http://www.safarimontage.com/support.
- The SAFARI Montage SuperSet XXVII Supplemental drive is to be permanently installed in tandem with currently installed SuperSet content drives. Currently installed drives must remain in the server for the supplemental drive to function properly.
- Removal of the supplemental drive is required when replacing the primary content drive(s).

Usage Instructions

1. Shutdown the SAFARI Montage server:
   - Navigate to Admin → Tools → Reboot and Shut Down.
   - Click on the Shut Down button and verify you are shutting down the server.
     If performing the server shut down from the console:
     - Select option #3 followed by option #7.

2. Insert the received SuperSet XXXI Supplemental Content Drive into the next available open bay of the server. Be sure the sled latch clicks into place, ensuring proper drive seating.

3. Power on the SAFARI Montage server.
   - For customers using the following servers, see Page 4 for additional steps needed during server boot up:
     - T-420
     - T-440X
     - RM-126X
     - RM-440X
     - RM-640
     - RM-640X
     - WAN-880X
     - WAN-1212X
     - WAN-1240
   - For customers using the following server, see Page 5 for additional steps needed during server boot up:
     - WAN-1212
4. Log in to the SAFARI Montage web interface with Administrator privileges.
6. Click on the Manage Supplemental Drives link at the top of the page.

7. Link the supplemental drive to the installed content drive(s) by clicking on the Link action. When linking is complete, click Return to Supplemental Drive Management to verify the link status and link an additional drive.
   
   **Note:** One supplemental drive can be linked to only one high resolution content drive and one low resolution content drive. If multiple content drives exist, multiple supplemental drives can be installed and linked.

8. After supplemental drive linking is complete, activate all new packages – ADMIN > Content & Modules > Activate ALL.
   
   **Note:** New package licensing has been pre-entered and is ready to activate.

   For customers using the SAFARI Montage WAN Manager module, continue with Steps 9 and 10; else skip to Step 11.

9. Assign new packages, mirroring assignments for retiring packages – ADMIN > WAN Manager > Schools. A Package map of new and retiring packages is on page 3.

10. Un-assign retiring packages from all schools – ADMIN > WAN Manager > Schools.

11. Deactivate retiring packages – ADMIN > Content & Modules > Content Packages.

12. Remap Playlists and Lessons by navigating to ADMIN > Tools > System Volumes and clicking on the Map Playlist and Lesson Items link.

   ~ THIS COMPLETES THE DRIVE INSTALLATION ~
### Package Map

**Notes:**
- 300K Spanish packages may be omitted for customers that have licensed the following as Spanish titles are now included in the 300K versions of these packages. For all other packages, 300K Spanish package must remain.
  - K-8 Super Core (2014)
  - K-12 Super Core (2014)
  - 9-12 Super Core (2014)
  - 9-12 Expansion (2014)
- Each package listed below refers to all formats and bit rates for the noted package.

</table>
For the following servers, Virtual Disk Management will need to be configured:

- T-420
- T-440X
- RM-126X
- RM-440X
- RM-640
- RM-640X
- WAN-880X
- WAN-1212X
- WAN-1240

To configure the Virtual Disk Management, perform the following on system boot:

1. Press “C” when prompted regarding a foreign configuration has been found or VDs are missing.
2. Use the arrow keys and navigate the PERC adapter BIOS screen and select **Controller 0**.
3. Press the **F2** key to open a sub-menu and choose **Foreign Config** from the options.
4. Select Import from the Foreign Config sub-menu.
5. Use the arrow keys and select **Yes** and press the enter key.
6. Press the ESC key and select **OK**.
7. Press <CTRL + ALT+DEL> to reboot the server.
For the WAN-1212 server, MegaRAID Bios will need to be configured. To configure the MegaRAID BIOS, perform the following on system boot:

1. Press "C" when prompted, regarding the finding of a foreign configuration or missing VDs.
   **Note**: Access to the LSI MegaRAID SAS controller can also be initiated by pressing <Ctrl>+<H> when prompted.

2. Click **Start** button to access MegaRAID BIOS Config Utility.

3. Click **Configuration Wizard** link from Navigation to access to the Configuration Wizard.
4. Select **Add Configuration** and click **Next**.

5. Select **Manual Configuration** under the Configuration Method and click **Next** to continue.
6. Select the install hard drive from the Drives list and click the Add to Array button.

7. Click on the Accept DG button, to accept the Drive Group from under the Drive Groups and click Next to continue.
8. Select the hard drive from the **Array With Free Space** drop down and click the **Add to SPAN** button. Click **Next** to continue.

9. Click on the **Accept** button to save the drive configuration. Click on the **Yes** button when prompted regarding use of **Write Through mode**. Click on **Next** to continue.

10. Click **Accept** to save the virtual drive configuration. Click **Yes** to confirm the save.
11. Click **No** when asked to initialize the virtual drive.

12. Click on the **Exit** link, from the left-hand navigation, followed by clicking the **Yes** button.
13. Press `<CTRL>+<ALT>+<DELETE>` to restart the server.
