

SAFARI MONTAGE®

Mobile Broadcast Cart

Broadcast live streams with the SAFARI Montage Mobile Broadcast Cart

The SAFARI Montage Mobile Broadcast Cart is a mobile A/V cabinet custom designed and built by AV Rover, and equipped with all the components necessary for originating and distributing a live video program.

The Mobile Broadcast Cart is perfect for K-12 educational use, such as school news, announcements, theatrical performances, professional development, and even distance learning. It includes a 4U locking storage drawer with onboard power outlets and a 24" monitor mounted on an articulating arm.

The SAFARI Montage Broadcast Encoder provides unicast or multicast streams, and supports ADA mandated closed-captioning.

Supports SAFARI Montage IPTV & Live Media Streaming and SAFARI Montage Digital Signage Solutions.

Items pictured may vary depending on cart design and options selected.

ACCESSORIES

AA Battery Charger with 8-Pack Rechargeable AA Batteries (for wireless mics)
Assorted Cables
Cart Tools

OPTIONAL ITEMS

2nd HD Camcorder and Tripod
Green Screen Kit with Stand and 2 Soft Lights
Network switch (mounted internally) with 2 Ethernet ports on input panel to allow networking of Blackmagic ATEM switcher¹

¹ The Blackmagic ATEM Television Studio HD switcher is a network device that may be configured and accessed directly from a local laptop via an Ethernet cable or accessed over the District WAN. Accessing the switcher via the network requires an optional network switch which can be added to the cart configuration and will also provide two network ports on the custom input panel.
